VoiceAccess enables carriers to offer small and medium businesses a cost saving voice trunking solution.

Hosted Business Trunking Solution

VoiceAccess integrates with existing legacy PBXs and key phone systems to deliver the benefits of VoIP to businesses. With VoiceAccess, you can provide your business customers with a seamless introduction into the world of VoIP. Simply:

- Select the type of service that best fits your customer's needs:
 - **VoiceAccess Outbound Only** offers low outbound calling rates to destinations all over the world
 - **VoiceAccess Basic** provides both low cost inbound and outbound calling
 - **VoiceAccess Plus** includes all the features of the basic service plus VoiceMail and Call Forwarding, ensuring that calls are not missed should your customer's IP connection fails
- A telephone adapter or gateway is connected to your customer's existing network to enable VoIP calling. You can utilize one of the many hardware devices offered by IDT or select devices from companies such as Linksys, Quintum, Cisco, Audio Codes and Sipura.
- A telephone number is associated to your customer's VoiceAccess account to enable inbound calling. Regardless of their location, your customers can choose phone numbers from over 30 countries around the world.

VoiceAccess Service Overview
