Dialocal provides your customers with a telephone number from another country, allowing their overseas friends, family and business contacts to call them for the price of a local call.

Delivering Savings

Dialocal provides customers with phone numbers from major cities all over the world, no matter where they reside. When a customer chooses a number in a foreign city, their friends, family and business contacts in that city will be able to contact them for the price of a local call. For example, if your customer lives in Australia and chooses a number in London, their contacts in London will be able to dial a local London number and reach them in Australia. Since the caller is charged the price of a local call, they can save every time they call.

Dialocal is an inbound calling service that is added to your customer's existing phone service. Since they don't need any additional equipment or adapters, Dialocal is the perfect complement to an existing mobile or landline phone service.

Carrier Benefits

- Increase the average revenue per user (ARPU) from your existing customer base
- Reduce churn by offering an additional value-added service
- Grow your revenue by staying ahead of the competition and attracting new customers
- Minimize capital expenditures while quickly and easily implementing a new service

Dialocal

Stay in Touch for Less

With Dialocal, your customers' overseas contacts can call them for the price of a local call.

Your customer only pays for the calls they receive and a small monthly fee for the telephone number.

Powerful Relationships

Innovative Technology

Standard Features

- Call Forwarding
- Call Blocking
- Caller ID

Optional Value-Added Features

- Reach Me
- VoiceMail
- Customized Caller ID
- Bundled Calling Card
- Auto Recharge

Seamless Solution

Virtual numbers are the perfect turnkey addition to your current landline and mobile offerings:

- Callers don't need additional equipment, so Dialocal can be marketed to your entire customer base
- Service providers have the flexibility to terminate calls through their own network or the IDT network, which has delivered calls to millions of customers for over a decade
- Provisioning is seamless through our Web-based Partner Resource Center or API integration with your current account management system
- Your customers can manage their accounts through a Web interface, which can be customized and incorporated into your site
